

Pre-paid cards and accounts.

Go cashless with personal TouchTopUp accounts.

Create a cashless environment.

Simplify processes, reduce theft and speed up service with a TouchTopUp cashless solution. Combine prepaid cards with real-time cloud-based reporting and management that you can access from anywhere.

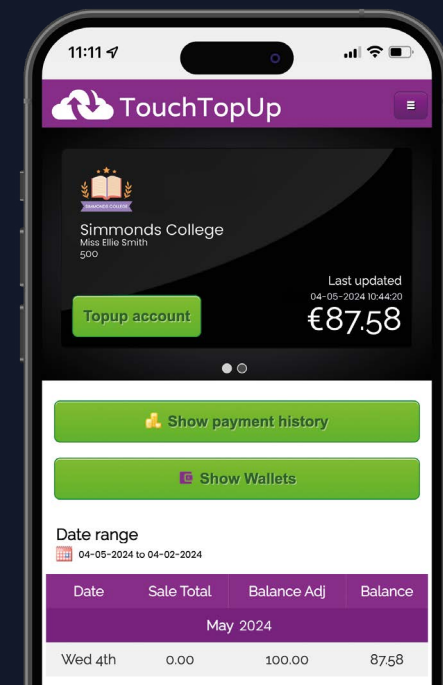

The solution is ideal for environments and venues where cash is impractical, whether that's within education settings, leisure centres, factories and waterparks. Customers can swiftly verify their identity in numerous ways, making it effortless to spend or top up their funds.

Monitor spending.

TouchTopUp's reporting and monitoring helps ensure that the money credited to accounts can only be spent on what it's intended for. This is particularly ideal in a school setting, to ensure money given to pupils is spent in school.

Parents can view the details of each individual transaction, and are able to monitor their children's food choices and budgeting skills.

The solution can also help remove the stigma of free school meals by protecting a student's anonymity at the point of sale.

Reduce theft.

Remove the need to carry cash by using TouchTopUp and reduce the chance of theft.

Photo ID.

If your customer forgets their card it's not a problem as you can verify identity using Photo ID.

Speed up service.

Without the hassle of cash or credit card processing, queuing times are reduced and service speed increases.

Online access.

With touchtopup.net, all your customers can access their accounts and settings online from anywhere.

Multiple accounts.

If responsible for multiple people, you can have access to multiple accounts from one place.

Integration.

TouchTopUp integrates seamlessly. Balances can be viewed and topped up with the use of your TouchPoint till.

Instant funds.

Funds appear straight away when topping up an account, allowing the customer to spend their money instantly.

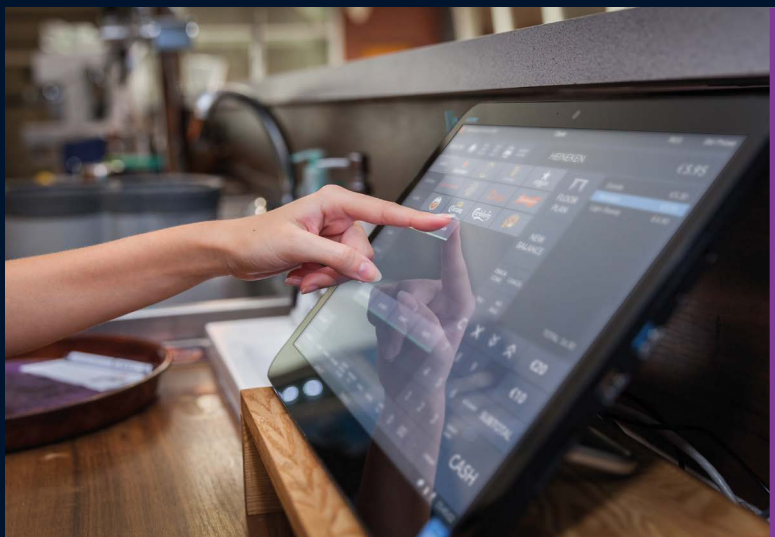

Wallets.

For non food items such as school trips or equipment, accounts can be assigned a digital wallet.

Facilitate spending.

TouchTopUp makes it effortless for customers to make purchases which results in more frequent spending.

Streamline your operations with one simple, fully integrated ecosystem from ICRTouch.

With TouchTopUp you can monitor spend and individual transactions. Balances can be topped up effortlessly either online or through your TouchPoint till. TouchTopUp provides an alternative approach to spending in environments where cash is impractical.

Prioritise efficiency with the ICRTouch ecosystem and create a flexible environment. The integration of our systems provide you with robust and reliable solutions that streamline your operations. Implement ICRTouch solutions to increase efficiency and watch your revenue skyrocket.
